

UČNI NAČRT PREDMETA / COURSE SYLLABUS	
Predmet:	VARNOST V LOGISTIKI IN LOGISTIKA OBVEŠČEVALNO-VARNOSTNE DEJAVNOSTI
Course title:	SECURITY IN LOGISTICS AND LOGISTICS OF INTELLIGENCE

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
LOGISTIKA SISTEMOV 1. stopnja		3.	5.
SYSTEM LOGISTICS 1. degree		3.	5.

Vrsta predmeta / Course type	IZBIRNI
------------------------------	---------

Univerzitetna koda predmeta / University course code:	UN
-------------------------------------------------------	----

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Laboratory work	Druge oblike študija Field work	Samost. delo Individ. work	ECTS
24 e-P 21 a-P		24 e-V 21 a-V			90	6

* a-P: avditorna predavanja; a-V: avditorske vaje; e-P: e-predavanja v spletni učilnici Moodle; e-V: e-vaje v spletni učilnici Moodle

Nosilec predmeta / Lecturer:	TEODORA IVANUŠA
------------------------------	-----------------

Jeziki / Languages:	Predavanja / Lectures: SLOVENSKI / SLOVENE
	Vaje / Tutorial: SLOVENSKI / SLOVENE

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:
Prerequisites:

Ni pogojev.	None
-------------	------

Vsebina:

Zahtevnost predmeta na UN študijskem programu se za razliko od VS programa temu primerno tudi razlikuje: pridobivanje znanja je obširnejše in zahtevnejše, vključuje se sistemsko razmišljanje.

- Opredelitev lokalnega, nacionalnega, regionalnega in mednarodnega varnostnega okolja
- Varnostni koncepti v logističnih procesih in pomen varnostnih mehanizmov v logistiki in logističnih procesih
- Bistvo in pomen logistične varnosti, logistična varnost kot konkurenčna prednost
- Logistična varnost kot sestavni del integralnega varnostnega sistema
- Ocena ranljivosti, ogroženosti ter poslovnih in varnostnih tveganj v podjetju
- Požarna varnost ter varnost in zdravje pri delu.
- Varstvo okolja, okoljski vidiki, ekološka zaščita
- Uvajanje varnostnih standardov v logistične procese
- Varnostni ukrepi v procesu skladiščenja, v razkladalno-nakladalnih procesih, v notranjem in zunanjem transportu ter na prometnih poteh

Content (Syllabus outline):

Difficulty of this subject of the UN study program varies from the difficulty of the subject of the VS study program: the acquisition of knowledge is more extensive and more complex, involving systemic thinking.

- Defining local, national, regional and international security environment
- Security concepts in logistics processes and the importance of security mechanisms in logistics and in logistics processes
- The main importance of logistics security, logistics security as a competitive advantage
- Logistics security as a part of integral security system.
- Level of vulnerability, threat and business and security risks in a company
- Fire safety, safety at work and health at work
- Environment protection, environmental aspects, ecological protection
- Integration of security standards into logistics processes
- Security measures in warehousing processes, in loading and unloading processes, in inner and outer transport, and in transport channels

Predvideni študijski rezultati:

Intended learning outcomes:

<p>Znanje in razumevanje:</p> <ul style="list-style-type: none"> • Spoznajo podlago za obvezne in priporočljive varnostne mehanizme • Spoznajo osnove uvajanja integralnih varnostnih sistemov v podjetjih logistične narave • Osvojijo strokovna znanja za varnostno obvladovanje logističnih procesov • Dobijo osnovni vpogled v varnostne standarde • Se seznanijo z metodologijo ocenjevanja ogroženosti in varnostnih • Spoznajo postopke ugotavljanja raljivih točk in varnostnih vrzeli v logistiki • So usposobljeni za načrtovanje in izvajanje varnostnih ukrepov v logističnih procesih <p>Prenesljive/ključne spremnosti in drugi atributi:</p> <p>Znanja s področja pravnih in organizacijskih podlag varovanja in zaščite ter znanja in spoznanja iz varnostne stroke za potrebe logistike, bodočim diplomantom omogočajo samostojno in temsco uvajanje varnostnih mehanizmov v logistične procese. Poleg tega se lahko diplomanti suvereno vključujejo v projekte, ki se nanašajo na analizo in razvoj logističnih procesov, na oblikovanje varnostnih izboljšav in na uvajanje varnostnih standardov ter obvladajo razlikovanje med strateškimi in nestrateškimi podatki/informacijami. Diplomanti razpolagajo tudi z osnovnimi znanji in prijemi upravljanja in obvladovanja logističnih tveganj.</p>	<p>Knowledge and Understanding:</p> <ul style="list-style-type: none"> • To get familiar with the basics for mandatory and recommended security mechanisms • To get familiar with the basics of integrating the integral security systems in logistics companies • To acquire specialized knowledge of security management of logistics processes • To gain an insight into security standards • To get familiar with the methodology for estimating threats and security risks • To estimate vulnerability, threat and risks in logistics processes • To plan and implement security measures in logistics processes <p>Transferable/Key Skills and other attributes:</p> <p>With the help of the knowledge from the field of legal and organizational basics of security and protection as well as the knowledge and understanding of security for logistics purposes. Future graduates are able to participate in projects dealing with analysis and development of logistics processes, design of security improvements and introduction of security standards, and know the difference between strategic and non-strategic information. Graduates acquire basic knowledge and approaches of managing and mastering logistics risks.</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>Metode poučevanja in učenja:</p> <p>Predavanja: pri predavanjih študent spozna teoretične vsebine predmeta. Del predavanj se izvaja na klasični način v predavalnici, del pa v obliki e-predavanj (v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).</p> <p>Vaje: pri vajah študent utrdi teoretično znanje in spozna aplikativne možnosti. Del vaj se izvaja na klasični način v predavalnici, del v obliki e-predavanj (v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju), del pa na terenu (obisk inštitucij).</p>	<p>Learning and teaching methods:</p> <p>Lectures: Students understand the theoretical frameworks of the course. Part of the lecture course is held in standard classroom while the rest is in the form of e-learning (with the help of specially designed e-material in a virtual electronic learning environment).</p> <p>Tutorials: Students enhance their theoretical knowledge and are able to apply it. Part of the tutorial is held in standard classroom while the rest is in the form of e-learning (with the help of specially designed e-material in a virtual electronic learning environment), and part of it on the field (institutions visits).</p>
