

#### About us:

Comtrade is the top IT company, with a 25-year track record of innovation and development of some of the world's most advanced software. With high-tech infrastructure and campuses in 10 countries, we enable companies across different industries (fintech, mobility & travel, medical, energy etc.) to innovate faster and reinvent their business models digitally, by using agile development methodologies and innovative technology.

The internship will be within the **Industry Innovation Lab**. We are focusing on transforming purely service-oriented businesses into product/solution-oriented ones.

Our focus is on advanced industry solutions in following areas:

Logistics/Intralogistics/Supply, Chain Management, Maintenance/Machine Learning, Industrial IoT, Preventive and Predictive Maintenance, Retrofitting and Modernization of Industrial systems.

#### We are looking for:

- Students of graduate or post graduate program focusing on business and logistics
- Students looking for a company to write their bachelor/master thesis with
- Native German speakers
- Fluent in English
- Additional languages always a plus
- Minimum duration 3 months, max not limited

Application deadline: 19<sup>th</sup> of April, 2019

#### What we offer:

We will jointly work on creating ideas for new businesses and business models. You will help us evaluate them, analyze its market potential, work on proofs of concept, test concepts with potential customers and gather feedback until idea is either rejected or qualified for development. We will test our ideas in interviews with potential customers, at fairs, conferences, we will analyze current market, and study future trends. During your internship you will learn about tools and methodologies including design thinking, business canvas and lean startup. Everything you need to know to turn a small idea into something big.
