

## UČNI NAČRT PREDMETA / COURSE SYLLABUS

**Ime predmeta:** INTRALOGISTIKA 4.0  
**Course title:** INTRALOGISTICS 4.0

Študijski program in stopnja Study programme and cycle	Študijska smer Study option	Letnik Year of study	Semester Semester
LOGISTIKA SISTEMOV 3. stopnja		1.	1. in 2.
SYSTEM LOGISTICS 3 <sup>rd</sup> degree		1.	1. in 2.

**Vrsta predmeta (obvezni ali izbirni) /  
Course type (compulsory or elective)**

IZBIRNI  
ELECTIVE

**Univerzitetna koda predmeta / University course code:**

DR

Predavanja Lectures	Seminar Seminar	Vaje Tutorial			Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS
20		AV	LV	RV			160	6

**Nosilec predmeta / Course coordinator:**

STONE LERHER

**Jeziki /Languages:**

**Predavanja / Lectures:** SLOVENSKI/SLOVENE

**Vaje / Tutorial:** SLOVENSKI/SLOVENE

**Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:**

Ni posebnih omejitev.

**Prerequisites for enrolling in the course or for performing study obligations:**

No special conditions.

**Vsebina (kratek pregled učnega načrta):**

- Pomen intralogistike 4.0 v logistični verigi z vidika pretočne zmogljivosti, energetske učinkovitosti, trajnosti, informacijske podpore logističnim procesom ter digitalizacije.
- Sodobni trendi v logistiki 4.0 (Industrija 4.0, Skladiščenje 4.0, Internet Stvari (IoT), Digitalizacija, Robotizacija, Umetna Inteligenca, ang. Physical Internet.
- Informacijski in materialni tok v intralogistiki 4.0.
- Skladiščni procesi v intralogistiki 4.0.
- Skladiščenje 4.0 s poudarkom na procesu Komisioniranja blaga.
- Centralno in decentralno vodeni transportno sistemi v intralogistiki 4.0.
- Avtomatski in avtonomni transportno-skladiščni sistemi v intralogistiki 4.0. (ang. Automated Storage and Retrieval Systems, Shuttle-Based

**Content (syllabus outline):**

- The importance of intralogistics 4.0 in the logistics chain in terms of throughput capacity, energy efficiency, sustainability, information support to logistics processes and digitization.
- Modern trends in logistics 4.0 (Industry 4.0, Warehousing 4.0, Internet of Things (IoT), Digitalization, Robotization, Artificial Intelligence, Physical Internet.
- Information and material flow in intralogistics 4.0.
- Warehouse processes in intralogistics 4.0.
- Warehousing 4.0 with the emphasis on the process of Order-Picking.
- Centralised and decentralised control of transport systems in intralogistics 4.0.
- Automatic and autonomous transport and warehousing systems in intralogistics 4.0

<p>Storage and Retrieval Systems and Autonomous Vehicle Storage and Retrieval Systems).</p> <ul style="list-style-type: none"> <li>- Načrtovanje in modeliranje transportno-skladiščnih sistemov v intralogistiki 4.0 s poudarkom na: maksimalni pretočni zmogljivosti, minimalnih celotnih stroških, energetski učinkovitosti in trajnosti.</li> <li>- Več-objektna optimizacija transportno-skladiščnih sistemov v intralogistiki 4.0.</li> </ul>	<p>(Automated Storage and Retrieval Systems, Shuttle-Based Storage and Retrieval Systems and Autonomous Vehicle Storage and Retrieval Systems).</p> <ul style="list-style-type: none"> <li>- Design and modelling of transport and warehousing systems in intralogistics 4.0 with the emphasis on: maximum throughput capacity, minimum total cost, energy efficiency and sustainability.</li> <li>- Multi-objective optimization of transport and warehousing systems in intralogistics 4.0</li> </ul>
---	---

---

#### Cilji in kompetence:

- |  |
|--|
| <ul style="list-style-type: none"> <li>- Podati povezana znanja sistemov intralogistike 4.0, s poudarkom na notranjem transportu, skladiščenju in komisioniranju.</li> <li>- Razviti sposobnost študentov za samostojno znanstveno-raziskovalno reševanje problemov načrtovanja in oblikovanja intralogistike 4.0, notranjega transporta, skladiščenja in komisioniranja.</li> </ul> |
|--|

#### Objectives and competences:

- |  |
|--|
| <ul style="list-style-type: none"> <li>- To provide integrated knowledge of the intralogistics 4.0 systems, with the emphasis on internal transport, warehousing and order-picking.</li> <li>- To develop student's capabilities of independent scientific-research solution solving for planning and designing of intralogistics 4.0, internal transport, warehousing and order-picking.</li> </ul> |
|--|

#### Predvideni študijski rezultati:

- |   |
|---|
| <p>Znanje in razumevanje:</p> <ul style="list-style-type: none"> <li>- Poznavanje sistemov intralogistike 4.0 v logistični verigi s poudarkom na notranjem transportu, skladiščenju in komisioniranju.</li> <li>- Znati znanstveno in raziskovalno predvideti in uporabiti napredne metode, modele, tehnike pri načrtovanju, oblikovanju in optimiranju sistemov intralogistike 4.0.</li> </ul> |
|---|

#### Intended learning outcomes:

- |   |
|---|
| <p>Knowledge and understanding:</p> <ul style="list-style-type: none"> <li>- Knowledge of intralogistics 4.0 systems in the logistics chain, with the emphasis on internal transport, warehousing and order-picking.</li> <li>- Knowledge of proper scientific-research anticipation and application of advanced methods, models, techniques by planning, design and optimization of intralogistics 4.0 systems.</li> </ul> |
|---|

– Povezovanje teoretičnih znanj in analitičnih/numeričnih modelov pri izdelavi študij z uporabo naprednih računalniško podprtih orodij.

Prenesljive/ključne spretnosti in drugi atributi:

- Potrebno inženirsko znanje za načrtovanje, oblikovanje, modeliranje in optimiranje sistemov intralogistike 4.0 s poudarkom na notranjem transportu, skladiščenju in komisioniranju.
- Poznavanje in uporaba naprednih računalniško podprtih orodij za oblikovanje, modeliranje in optimiranje sistemov intralogistike 4.0

– Integration of theoretical knowledge and analytical/ numerical models in the development of studies by using advanced computer-aided tools.

Transferable/Key Skills and other attributes:

- The necessary engineering knowledge for planning, designing, modelling and optimizing intralogistics 4.0 systems, with an emphasis on internal transport, warehousing and order-picking.
- The knowledge and the application of the advanced computer-aided tools for design, modelling and optimization of intralogistics 4.0 systems.

#### Metode poučevanja in učenja:

- Predavanja.
- Konzultacije.
- Samostojno delo.
- Izdelava (projektne) seminarske naloge.

#### Learning and teaching methods:

- Lectures.
- Consultations.
- Individual work.
- Seminar (project) work.

Načini ocenjevanja:	Delež (v %) / Share (in %)	Assessment methods:
– Raziskovalna naloga.	50%	– Research work.
– Izpit (teoretično in praktično znanje).	50%	– Exam (theoretical and practical knowledge).
