

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	METODE IN TEHNIKE PLANIRANJA LOGISTIČNIH PROCESOV
Course title:	METHODS AND TECHNICS FOR DESIGN OF LOGISTIC PROCESSES

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
GOSPODARSKA IN TEHNIŠKA LOGISTIKA 1. stopnja		3	5
PROFESSIONAL HIGHER EDUCATION STUDY PROGRAMME ECONOMIC AND TECHNICAL LOGISTICS 1. degree			

Vrsta predmeta / Course type: OBVEZNI

Univerzitetna koda predmeta / University course code: VS

Predavanja Lectures	Seminar Seminar	vaje Tutorial	Laboratory work	Druge oblike študija Field work	Samost. delo Individ. work	ECTS
e-P 15 a-P 30		e-V 9 a-V 21			105	6

Nosilec predmeta / Lecturer: IZTOK POTRČ

Jeziki / Predavanja / Lectures: SLOVENSKI / SLOVENE
 Languages: Vaje / Tutorial: SLOVENSKI / SLOVENE

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Prerequisites:

Absolvirane vsebine s področij:

- Osnove logističnih tehnik in tehnologij

Passed examinations:

- Introduction to Logistics Techniques and Technologies

Vsebina:

Content (Syllabus outline):

Predavanja:

- Uvodna predstavitev vpliva projektnih parametrov na izbiro sistema sestave
- Metode in tehnika načrtovanja montažnega sistema (postavitev problema, grobo načrtovanje, fino načrtovanje, realizacija, preskusni zagon)
- Osnovne tehnike montaže in vpliv sistema transporta (oblike postavitve montažnega sistema brez avtomatiziranega toka izdelkov, delno in popolno avtomatizirani sistemi sestave s transportnim in skladiščnim sistemom)

Lectures:

- Introduction on influence of project parameters to assembly.
- Methods and technics for planning of assembly systems (problem determination, rough planning, fine planning, realisation, start-up procedures)
- Basic technics of assembly and montage systems and influence of manner of transportation an material handling system (Assembly and montage systems without automatically material flow, partly- and completely automatic assembly systems with

<ul style="list-style-type: none"> • Pripomočki za načrtovanje sistema sestave (določitev časa takta, določitev števila delovnih mest, določitev vmesnih skladišč, določitev materialnega toka, določitev informacijskih tokov) • Informacijski tokovi in nosilci informacij (Črna koda, RFID, Pick by light/voice ...) • Vmesna skladišča (linijsko vm. skladišče, obtočno vm. skladišče, posebni primeri skladiščenja) • Varnostne zahteve in primeri montažnih celic <p><u>Seminar:</u> Seminar aplikativno dopolnjujejo vsebino predavanj s praktičnim reševanjem problemov določanja montažnih sistemov in sistemov sestave.</p>

<p>transportation and warehouse systems).</p> <ul style="list-style-type: none"> • Shifts for design of assembly systems (determination of assembly rhythm, determination of number of working places, determination of buffers, determination of material and information flow), • Information flow and information carriers (bar-code, RFID, Pick by light, Pick by voice, ...) • Buffers (on transportation line buffers, circulation-type buffers, special cases of warehousing) • Safety demands and cases of assembly cells. <p><u>Seminar:</u> Seminar (project) work supplement lectures with practical solutions design problems by assembly systems.</p>
--

Temeljni literatura in viri / Readings:

<ul style="list-style-type: none"> • A. Redford, J. Chal: Design for Assembly, (Mcgraw-Hill Book Company, London 1994) • Davis R. Business Process Modeling with Aris, Springer, London, 2001 • Scheer A.W.: Business Process Engineering – Reference models for industrial enterprises, Springer-Verlag, Berlin, 1996 • Konold/Reger : Angewandte Montagetechnik (Vieweg Verlag 1997) • Pfohl : Logistiksysteme (Springer Verlag 1985) • Potrč : Transportni sistemi (zbrano gradivo) (FS, 1999)

Cilji in kompetence:

<ul style="list-style-type: none"> • Osvojitve osnovne metodike pri projektiranju montažnih sistemov • Spoznavanje načinov sestave in ekonomska upravičenost avtomatizacije sistema sestave

Objectives and competences:

<ul style="list-style-type: none"> • To get aware of basic methods for design of assembly and montage systems • Insight into design manners and economic authorization of automatization by assembly systems
--

Predvideni študijski rezultati:

<p><u>Znanje in razumevanje:</u></p> <ul style="list-style-type: none"> • poznavanje specialnega področja sistemov sestave, • povezovanje konceptov logističnega transportnega sistema v smislu integralnega transporta <p><u>Prenesljive/ključne spretnosti in drugi atributi:</u></p> <ul style="list-style-type: none"> • povezovati uporabo različnih inženirskih znanj za reševanje problemov integralnega transporta na omejenih območjih, • študenta izobraziti do nivoja, da se je sposoben soočiti s problemom reševanja novih idej
--

Intended learning outcomes:

<p><u>Knowledge and understanding:</u></p> <ul style="list-style-type: none"> • special knowledge of all kinds of assembly systems, • connection between transportation and logistics systems concepts, into the integral transportation <p><u>Transferable/Key skills and other attributes:</u></p> <ul style="list-style-type: none"> • combined use of different engineering skills for solution of integral transport in the restricted (limited) areas, • to give students skills, that they can be involved in project work – solving new concepts
--

<p>Metode poučevanja in učenja:</p>

<p>Learning and teaching methods:</p>

<p>Predavanja: pri predavanjih študent spozna teoretične vsebine predmeta. Del predavanj se izvaja na klasični način v predavalnici, del pa v obliki e-predavanj (e-predavanja se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).</p> <p>Vaje: pri vajah študent utrdi teoretično znanje in spozna aplikativne možnosti. Del vaj se izvaja na klasični način v predavalnici, del pa v obliki e-predavanj (e-vaje se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).</p>	<p>Lectures: students understand the theoretical frameworks of the course. Part of the lecture course is in a classroom while the rest is in the form of e-learning (e-lectures may be given via video-conferencing or with the help of specially designed e-material in a virtual electronic learning environment).</p> <p>Tutorials: Students enhance their theoretical knowledge and are able to apply it. Part of the seminar is in a classroom while the rest is in the form of e-learning (e-seminars may be given via video-conferencing or with the help of specially designed e-material in a virtual electronic learning environment).</p> <p>•</p>
---	---

Načini ocenjevanja:	Delež (v %) / Weight (in %)	Assessment:
<p>Način (pisni izpit, ustno izpraševanje, naloge, projekt):</p> <ul style="list-style-type: none"> • opravljene domače in projektna naloga, • izpit (teoretično in praktično znanje). 	<p>50%</p> <p>50%</p>	<p>Type (examination, oral, coursework, project):</p> <ul style="list-style-type: none"> • completed home-works and seminar (project) work, • examination (theoretical and practical knowledge).
