

UČNI NAČRT PREDMETA/COURSE SYLLABUS	
Predmet:	INTRALOGISTIKA 4.0
Course title:	INTRALOGISTICS 4.0

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
LOGISTIKA SISTEMOV 3. stopnja		1.	1. in 2.
SYSTEM LOGISTICS 3 rd degree		1.	1. in 2.

Vrsta predmeta / Course type	IZBIRNI
------------------------------	---------

Univerzitetna koda predmeta / University course code:	DR

Nosilec predmeta / Lecturer:	TONE LERHER
------------------------------	-------------

Jeziki / Languages:	Predavanja / Lectures: SLOVENSKI / SLOVENE
	Vaje / Tutorial: SLOVENSKI / SLOVENE

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Ni posebnih omejitev.	No special conditions.
-----------------------	------------------------

Vsebina:

- Pomen intralogistike 4.0 v logistični verigi z vidika pretočne zmogljivosti, energetske učinkovitosti, trajnosti, informacijske podpore logističnim procesom ter digitalizacije.
- Sodobni trendi v logistiki 4.0 (Industrija 4.0, Skladiščenje 4.0, Internet Stvari (IoT), Digitalizacija, Robotizacija, Umetna Inteligenca, ang. Physical Internet).
- Informacijski in materialni tok v intralogistikici 4.0.
- Skladiščni procesi v intralogistikici 4.0.
- Skladiščenje 4.0 s poudarkom na procesu Komisioniranja blaga.
- Centralno in decentralno voden transportno sistemi v intralogistikici 4.0.
- Avtomatski in avtonomni transportno-skladiščni sistemi v intralogistikici 4.0. (ang. Automated Storage and Retrieval Systems, Shuttle-Based Storage and Retrieval Systems and Autonomous Vehicle Storage and Retrieval Systems).
- Načrtovanje in modeliranje transportno-skladiščnih sistemov v intralogistikici 4.0 s poudarkom na:

Content (Syllabus outline):

- The importance of intralogistics 4.0 in the logistics chain in terms of throughput capacity, energy efficiency, sustainability, information support to logistics processes and digitization.
- Modern trends in logistics 4.0 (Industry 4.0, Warehousing 4.0, Internet of Things (IoT), Digitalization, Robotization, Artificial Intelligence, Physical Internet).
- Information and material flow in intralogistics 4.0.
- Warehouse processes in intralogistics 4.0.
- Warehousing 4.0 with the emphasis on the process of Order-Picking.
- Centralised and decentralised control of transport systems in intralogistics 4.0.
- Automatic and autonomous transport and warehousing systems in intralogistics 4.0 (Automated Storage and Retrieval Systems, Shuttle-Based Storage and Retrieval Systems and Autonomous Vehicle Storage and Retrieval Systems).
- Design and modelling of transport and warehousing systems in intralogistics 4.0 with the emphasis on:

<p>maksimalni pretočni zmogljivosti, minimalnih celotnih stroških, energetski učinkovitosti in trajnosti.</p> <ul style="list-style-type: none"> - Več-objektiva optimizacija transportno-skladiščnih sistemov v intralogistiki 4.0. 	<p>maximum throughput capacity, minimum total cost, energy efficiency and sustainability.</p> <ul style="list-style-type: none"> - Multi-objective optimization of transport and warehousing systems in intralogistics 4.0

- Kagermann, Henning; Wahlster, Wolfgang; Helbig, Johannes. (2013). Recommendations for implementing the strategic initiative INDUSTRIE 4.0, National Academy of Science and Engineering, Germany.
- Lerher, T. & Šraml, M. (2012) Designing unit load automated storage and retrieval systems. V: MANZINI, Riccardo (editor). Warehousing in the global supply chain : advanced models, tools and applications for storage systems. London [etc.]: Springer. 2012, pp. 211-231.

Cilji in kompetence:

- Podati povezana znanja sistemov intralogistike 4.0, s poudarkom na notranjem transportu, skladiščenju in komisioniranju.
- Razviti sposobnost študentov za samostojno znanstveno-raziskovalno reševanje problemov načrtovanja in oblikovanja intralogistike 4.0, notranjega transporta, skladiščenja in komisioniranja.

Objectives and competences:

- To provide integrated knowledge of the intralogistics 4.0 systems, with the emphasis on internal transport, warehousing and order-picking.
- To develop student's capabilities of independent scientific-research solution solving for planning and designing of intralogistics 4.0, internal transport, warehousing and order-picking.

Predvideni študijski rezultati:

Znanje in razumevanje:

- Poznavanje sistemov intralogistike 4.0 v logistični verigi s poudarkom na notranjem transportu, skladiščenju in komisioniranju.
- Znati znanstveno in raziskovalno predvideti in uporabiti napredne metode, modele, tehnike pri načrtovanju, oblikovanju in optimiraju sistemov intralogistike 4.0.
- Povezovanje teoretičnih znanj in analitičnih/numeričnih modelov pri izdelavi študij z uporabo naprednih računalniško podprtih orodij.

Intended learning outcomes:

Knowledge and understanding:

- Knowledge of intralogistics 4.0 systems in the logistics chain, with the emphasis on internal transport, warehousing and order-picking.
- Knowledge of proper scientific-research anticipation and application of advanced methods, models, techniques by planning, design and optimization of intralogistics 4.0 systems.
- Integration of theoretical knowledge and analytical/numerical models in the development of studies by using advanced computer-aided tools.

Prenesljive/ključne spremnosti in drugi atributi:

- Potrebno inženirske znanje za načrtovanje, oblikovanje, modeliranje in optimirjanje sistemov intralogistike 4.0 s poudarkom na notranjem transportu, skladiščenju in komisioniranju.
- Poznavanje in uporaba naprednih računalniško

Transferable/Key Skills and other attributes:

- The necessary engineering knowledge for planning, designing, modelling and optimizing intralogistics 4.0 systems, with an emphasis on internal transport, warehousing and order-picking.
- The knowledge and the application of the advanced

podprtih orodjih za oblikovanje, modeliranje in optimiranje sistemov intralogistike 4.0	computer-aided tools for design, modelling and optimization of intralogistics 4.0 systems.
---	--

Metode poučevanja in učenja:

- Predavanja.
- Konzultacije.
- Samostojno delo.
- Izdelava (projektne) seminarske naloge.

Learning and teaching methods:

- Lectures.
- Consultations.
- Individual work.
- Seminar (project) work.

Načini ocenjevanja:	Delež (v %) / Weight (in %)	Assessment:
<ul style="list-style-type: none"> - Raziskovalna naloga. - Izpit (teoretično in praktično znanje). 	50 % 50 %	<ul style="list-style-type: none"> - Research work. - Exam (theoretical and practical knowledge).
