Cilji in kompetence:**Študenti:**

- osvojijo pojme o distribuciji,
- razumejo generično teorijo transporta,
- se naučijo razlikovati sistemski pristop od disciplinarnega razlikovanja prometa in logistike,
- se usposobijo za koherentno uvajanje tehničnih in tehnoloških, organizacijskih in drugih znanj o inteligentnih transportnih sistemih,
- spoznajo primere uporabe sistemov v praksi.

Objectives and competences:**Students:**

- learn about distribution,
- understand transport theory,
- learn to differentiate the systemic from the disciplinary approach to traffic and logistics,
- are trained to coherently integrate technical, technological and organizational knowledge on intelligent transport systems,
- are familiarized with different case studies.

Predvideni študijski rezultati:**Znanje in razumevanje:**

- tehnologije, tehnike, organizacije in distribucije.

Prenesljive/ključne spretnosti in drugi atributi:

Študenti se usposobijo za uporabo teoretičnega znanja v praktičnih (poslovnih) primerih.

Intended learning outcomes:**Knowledge and understanding:**

- technologies, techniques, organizations and distribution.

Transferable/Key Skills and other attributes:

Students learn to apply their theoretical knowledge to practical situations.

Metode poučevanja in učenja:

Predavanja: pri predavanjih študent spozna teoretične vsebine predmeta. Del predavanj se izvaja na klasični način v predavalnici, del pa v obliki e-predavanj (e-predavanja se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).

Vaje: pri vajah študent utrdi teoretično znanje in spozna aplikativne možnosti. Del vaj se izvaja na klasični način v predavalnici, del pa v obliki e-vaj (e-vaje se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).

Learning and teaching methods:

Lectures: students understand the theoretical frameworks of the course. Part of the lecture course is in a classroom while the rest is in the form of e-learning (e-lectures may be given via video-conferencing or with the help of specially designed e-material in a virtual electronic learning environment).

Tutorials: Students enhance their theoretical knowledge and are able to apply it. Part of the seminar is in a classroom while the rest is in the form of e-learning (e-tutorials may be given via video-conferencing or with the help of specially designed e-material in a virtual electronic learning environment).

Načini ocenjevanja:	Delež (v %) / Weight (in %)	Assessment:
<ul style="list-style-type: none"> ▪ Opravljene obveznosti e-predavanj in e-vaj so pogoj za pristop k izpitu. ▪ Pisni izpit. ▪ Seminarska naloga – članek. 	<p>70 %</p> <p>30 %</p>	<ul style="list-style-type: none"> ▪ Successful completion of e-lectures and e-tutorials is a prerequisite for entering the exam. ▪ Written examination. ▪ A seminar work – paper.
