Cilji in kompetence:

Cilj tega predmeta je študentom nuditi osnovna znanja o procesih in vlogi procesov pri razumevanju logistike. Spoznajo osnovne principe analize logističnih procesov in osnovne pristope k njihovemu obvladovanju.

Prav tako je cilj, da študenti spoznajo in razumejo trajnostne oskrbovalne verige, pomen upravljanja trajnostnih oskrbovalnih verig in povezave z upravljanjem z operacijami.

Objectives and competences:

The objective of this course is to provide students with basic knowledge about processes and the role of processes in understanding logistics. They learn about the basic principles of logistic process analysis and basic approaches to their control.

Students also understand sustainable supply chains, the importance of management of sustainable supply chains and connection to operation management.

Predvideni študijski rezultati:

Znanje in razumevanje:

- procesnega razmišljanja in razumevanja logistike kot procesa,
- pomena analiziranja, strukturiranja in obvladovanja logističnih procesov,
- vloge oskrbovalnih verig v sodobnem svetu

Intended learning outcomes:

Development of knowledge and understanding

- process thinking and understanding of logistics as a process,
- the importance of analyzing, structuring and managing logistic processes,
- the role of supply chains in modern world,

<ul style="list-style-type: none"> • pomena upravljanja trajnostnih oskrbovalnih verig, • strateškega planiranja trajnostnih oskrbovalnih verig, • osnov upravljanja z operacijami. <p>Prenesljive/ključne spremnosti in drugi atributi:</p> <ul style="list-style-type: none"> • študenti se usposobijo za uporabo teoretičnega znanja o logističnih procesih v praktičnem okolju, • študentje se usposobijo prepoznavati vlogo trajnostnih oskrbovalnih verig v sodobnem svetu, • študentje se usposobijo prepoznati pomen upravljanja trajnostnih oskrbovalnih verig. 	<ul style="list-style-type: none"> • the importance of managing sustainable supply chains, • strategic planning of sustainable supply chains, • basics of operations management. <p>Transferable/Key Skills and other attributes:</p> <ul style="list-style-type: none"> • students are trained to use theoretical knowledge about logistics processes in the practical environment, • students are trained to recognize the role of sustainable supply chains in the modern world, • students are trained to recognize the importance of managing sustainable supply chains.
--	---

Metode poučevanja in učenja:

Predmet vključuje različne metode poučevanja in učenja, kot so: predavanja, diskusjske skupine, video predstavitev in filmi, primeri iz prakse ter predstavitev in samostojni študij študentov.

Predavanja: pri predavanjih študent spozna teoretične vsebine predmeta. Del predavanj se izvaja na klasični način v predavalnici, del pa v obliki e-predavanj (e-predavanja se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).

Vaje: pri vajah študent utrdi teoretično znanje in spozna aplikativne možnosti. Del vaj se izvaja na klasični način v predavalnici, del pa v obliki e-vaj (e-vaje se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).

Learning and teaching methods:

This course uses a range of teaching methods including lectures, discussion groups, videos and films, case studies, student presentation and independent study of students.

Lectures: students understand the theoretical frameworks of the course. Part of the lecture course is in a classroom while the rest is in the form of e-learning (e-lectures may be given via videoconferencing or with the help of specially designed e-material in a virtual electronic learning environment).

Tutorials: Students enhance their theoretical knowledge and are able to apply it. Part of the seminar is in a classroom while the rest is in the form of e-learning (e-tutorials may be given via videoconferencing or with the help of specially designed e-material in a virtual electronic learning environment).

Delež (v %) /

Načini ocenjevanja:	Share (in %)	Assessment methods:
• Opravljene obveznosti e-predavanj in e-vaj so pogoj za pristop k izpitu.		• Successful completion of e-lectures and e-tutorial is a prerequisite for entering the exam.
• Aktivno delo študentov.	15%	• Active work of students.
• Seminarska naloga.	15%	• Seminar paper.
• Končni pisni izpit.	70%	• Final written examination.
