

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Ime predmeta:	UPORABA STATISTIČNIH METOD V LOGISTIKI
Course title:	APPLICATION OF STATISTICAL METHODS IN LOGISTICS

Študijski program in stopnja Study programme and cycle	Študijska smer Study option	Letnik Year of study	Semester Semester
GOSPODARSKA IN TEHNIŠKA LOGISTIKA 1. stopnja		2.	4.
PROFESSIONAL HIGHER EDUCATION STUDY PROGRAMME ECONOMIC AND TECHNICAL LOGISTICS 1 st degree		2.	4.

Vrsta predmeta (obvezni ali izbirni) / Course type (compulsory or elective)	OBVEZNI
	COMPULSORY

Univerzitetna koda predmeta / University course code:	VS
--------------------------------------------------------------	----

Predavanja Lectures	Seminar Seminar	Vaje Tutorial			Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS

Jeziki /Languages:	Predavanja / Lectures:	SLOVENSKI/SLOVENE
	Vaje / Tutorial:	SLOVENSKI/SLOVENE

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites for enrolling in the course or for performing study obligations:
Ni pogojev.	None.

Vsebina (kratek pregled učnega načrta):	Content (syllabus outline):
Urejanje in prikazovanje podatkov. Statistične mere: srednje vrednosti, mere variabilnosti, asimetrije, sploščenosti. Osnove verjetnostnega računa. Slučajne spremenljivke, najpomembnejše diskretne in zvezne porazdelitve, številске karakteristike slučajnih spremenljivk. Vzorčni pristop: intervalno ocenjevanje statističnih parametrov. Testiranje domnev o vrednostih statističnih parametrov in o porazdelitvah. Osnove regresije in korelacije. Osnove analize časovnih vrst.	Editing and presenting data. Statistical measures: mean values, variability measures, asymmetries, kurtosis. Basis of probability calculus. Random variables, most important discrete and continuous distributions, numerical characteristics of random variables. Sample approach: interval estimation of statistical parameters. Testing assumptions on values of statistical parameters and on disseminations. Basics of regression and correlation. Basics of analysis of time series.

Uporaba EXCELA v statistiki.

The use of Excel in statistics.

Temeljni literatura in viri / Reading materials:

E-gradivo predmeta.

KRAMBERGER, Tomaž. *Osnove modeliranja u logistici*. Subotica: [Ekonomski fakultet], 2015. 290 str., ilustr. ISBN 978-86-84819-98-9. [COBISS.SI-ID 512672317].

Tominc, P.: Statistika v prometu, Univerza v Mariboru, Fakulteta za gradbeništvo, Maribor, 2000.

Spiegel, M.: *Schaum's outline of theory and problems of statistics*, London, McGraw-Hill International, 1992.

Cilji in kompetence:

Študenti:

- se naučijo uporabljati orodja, tehnike in metode, ki omogočajo spremeniti različne podatke v uporabne informacije,
- se naučijo uporabe statističnih metod v analizi logističnih procesov in logističnih sistemov,
- se naučijo uporabljati Excel v namene statističnega preučevanja pojavov v logistiki.

Objectives and competences:

Students:

- learn to use tools, techniques and methods which enable them to change various data into useful information,
- learn to apply statistical methods in analysis of logistics processes and logistics systems,
- learn to use Excel for statistical analysis of phenomena in logistics.

Predvideni študijski rezultati:

Znanje in razumevanje:

- zmožnost analize in sinteze,
- zmožnost učenja,
- prepoznavanje in uporaba ustreznih analitičnih, konceptov in orodij,
- zmožnost analize problema in iskanja primernih rešitev.

Prenosljive/ključne spretnosti in drugi atributi:

Študenti se usposobijo za uporabo teoretičnega znanja v praktičnih primerih, predvsem pri predmetih Ravnanje z zaposlenimi, Metode in tehnike planiranja logističnih procesov in Vodenje projektov v logistiki.

Pridobljeno teoretično in aplikativno znanje imajo študenti možnost uporabiti pri obveznem praktičnem usposabljanju v organizaciji, ki je del študijskega programa.

Intended learning outcomes:

Knowledge and understanding:

- the ability to analyse and synthesise,
- the ability to learn,
- the ability to recognise and apply appropriate analytical concepts and tools,
- the ability to analyse a problem and to find adequate solutions to it.

Transferable/key skills and other attributes:

Students gain the ability to apply theoretical knowledge in practical examples, especially in courses Managing human resources, Methods and technics for design of logistic processes and Project leadership in logistics.

The acquired theoretical and applicative knowledge enables students to use it at practical training in an organization that is part of the study program.

Metode poučevanja in učenja:

Predavanja: pri predavanjih študent spozna teoretične vsebine predmeta. Del predavanj se izvaja na klasični način v predavalnici, del pa v obliki e-predavanj (e-predavanja se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).

Vaje: pri vajah študent utrdi teoretično znanje in spozna aplikativne možnosti. Del vaj se izvaja na

Learning and teaching methods:

Lectures: students understand the theoretical frameworks of the course. Part of the lecture course is in a classroom while the rest is in the form of e-learning (e-lectures may be given via video-conferencing or with the help of specially designed e-material in a virtual electronic learning environment).

Tutorials: Students enhance their theoretical knowledge and are able to apply it. Part of the

klasični način v predavalnici, del pa v obliki e-vaj (e-vaje se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).

seminar is in a classroom while the rest is in the form of e-learning (e-tutorials may be given via videoconferencing or with the help of specially designed e-material in a virtual electronic learning environment).

Načini ocenjevanja:	Delež (v %) / Share (in %)	Assessment methods:
<p>Opravljenosti obveznosti e-predavanj in e-vaj so pogoj za pristop k izpitu.</p> <ul style="list-style-type: none"> ▪ Pisni izpit, ▪ seminarska naloga. 	<p>70%</p> <p>30%</p>	<p>Successful completion of e-lectures and e-tutorials is a prerequisite for entering the exam.</p> <ul style="list-style-type: none"> ▪ Written exam, ▪ project work.
