

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Ime predmeta: PLANIRANJE IN VODENJE LOGISTIČNEGA SISTEMA
Course title: PLANNING AND MANAGEMENT OF LOGISTICS SYSTEMS

Študijski program in stopnja Study programme and cycle	Študijska smer Study option	Letnik Year of study	Semester Semester
LOGISTIKA SISTEMOV 1. stopnja		3.	5.
SYSTEM LOGISTICS 1 st degree		3.	5.

**Vrsta predmeta (obvezni ali izbirni) /
Course type (compulsory or elective)**

IZBIRNI
ELECTIVE

Univerzitetna koda predmeta / University course code:

UN

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS
15 e-P 30 a-P		24 e-V 21 a-V			90	6

Nosilec predmeta / Course coordinator:

IZTOK POTRČ

Jeziki /Languages:

Predavanja / Lectures: SLOVENSKI/SLOVENE

Vaje / Tutorial: SLOVENSKI/SLOVENE

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Ni pogojev.

Prerequisites for enrolling in the course or for performing study obligations:

No special conditions.

Vsebina (kratek pregled učnega načrta):

Predavanja:
 Povezava med načrtovanjem izdelkov in sistemom montaže (oblikovanje za montažo, tolerance, primeri oblikovanja).
 Postopki in sistematika načrtovanja montažnega sistema (postavitev problema, grobo načrtovanje, fino načrtovanje, realizacija, preskusni zagon).
 Osnovni principi sistema montaže in vpliv transportnega sistema (oblike postavitve montažnega sistema brez avtomatiziranega toka izdelkov, delno in popolno avtomatizirani sistemi sestave s transportnim in skladiščnim sistemom).
 Primeri montažnih linij in nivo delovnih postaj (ročna montaža, delno avtomatizirana in popolno avtomatizirana montažna mesta).

Content (syllabus outline):

Lectures:
 Linking between design and assembly (design for assembly, tolerances, design cases).
 Procedures and systematics on design of assembly systems (determination of problem, rough planning, fine planning, realisation, start-up procedures).
 Basic principles of assembly systems and influence of manner of transportation and material handling system (Assembly and montage systems without automatically material flow, partly- and completely automatic assembly systems with transportation and warehouse systems).
 Montage and assembly lines and level of technological points (manual assembly, partly an full automatic assembly points).

<p>Načrtovanje sistema sestave (določitev časa takta, določitev števila delovnih mest, določitev vmesnih skladišč, določitev materialnega toka, določitev informacijskih tokov).</p> <p>Elementi transportnega sistema (gnani in negnani transporterji, elementi za prevzem in preusmeritev).</p> <p>Informacijski tokovi in nosilci informacij (Črna koda, RFID, Pick by light/voice/vision...).</p> <p>Vmesna skladišča (linijsko vm. skladišče, obtočno vm. skladišče, posebni primeri skladiščenja).</p> <p>Varnostne zahteve in primeri montažnih celic.</p> <p><u>Seminar:</u> Seminar aplikativno dopolnjujejo vsebino predavanj s praktičnim reševanjem problemov določanja montažnih sistemov.</p>	<p>Design of assembly systems (determination of assembly rhythm, determination of number of working places, determination of buffers, determination of material and information flow).</p> <p>Elements of transportation and material handling system (powered and free conveyors, switch points, manipulation machines).</p> <p>Information flow and information carriers (bar-code, RFID, Pick by light,/voice/vision...).</p> <p>Buffers (on transportation line buffers, circulation-type buffers, special cases of warehousing).</p> <p>Safety demands and cases of assembly cells.</p> <p><u>Seminar:</u> Seminar (project) work supplement lectures with practical solutions design problems by assembly systems.</p>

Celje: Fakulteta za logistiko, Univerza v Mariboru.
--

Cilji in kompetence:

<ul style="list-style-type: none"> • Osvojitev osnovnih metod planiranja in vodenja logističnega sistema. • Projektna zasnova in modifikacija izdelka (naprave ali konstrukcije) v povezavi z montažnimi, funkcijskimi, proizvodnimi, tržnimi in ekološkimi zahtevami. • Osvojitev osnovne metodike pri planiranju in načrtovanju sistema montaže. • Spoznavanje načinov montaže in ekonomska upravičenost avtomatizacije sistema montaže.
--

Objectives and competences:

<ul style="list-style-type: none"> • Gaining knowledge of basic methods for planning and management of logistics systems. • Design plan and modification of product (device or construction) due to assembly, functional, technological, market and ecological requirements. • To get aware of basic methods for planning and design of the assembly systems. • Insight into design manners and economic authorization of automatisisation by assembly systems.

Predvideni študijski rezultati:

<p><u>Znanje in razumevanje:</u></p> <ul style="list-style-type: none"> • poznavanje specialnega področja planiranja in vodenja logističnega sistema,
--

Intended learning outcomes:

<p><u>Knowledge and understanding:</u></p> <ul style="list-style-type: none"> • special knowledge of planning and management of logistics systems,

- poznavanje specialnega področja sistemov montaže,
- znati izbrati ustrezno podporo materialnega toka v sistemih montaže glede zahtev po zmogljivosti,
- povezovanje konceptov logističnega transportnega sistema v smislu integralnega transporta.

Prenesljive/ključne spretnosti in drugi atributi:

- povezovati uporabo različnih inženirskih znanj za reševanje problemov planiranja materialnih tokov v sistemih montaže,
- študenta izobraziti do nivoja, da se je sposoben soočiti s problemom reševanja novih idej načrtovanja, oblikovanja in optimiranja sistemov montaže.

- special knowledge of all kinds of the assembly systems,
- knowledge of proper determination of proper support for material flow due to demanded capacity,
- connection of transport-logistics systems concepts, into the integral transport.

Transferable/Key skills and other attributes:

- combined use of different engineering skills for solution of material flow planning problems in assembly systems,
- to give students skills, that they can be involved in project work – solving new concepts of planning, design and optimization of the assembly systems.

Metode poučevanja in učenja:

Predavanja: pri predavanjih študent spozna teoretične vsebine predmeta. Del predavanj se izvaja na klasični način v predavalnici, del pa v obliki e-predavanj (e-predavanja se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).

Vaje: pri vajah študent utrdi teoretično znanje in spozna aplikativne možnosti. Del vaj se izvaja na klasični način v predavalnici, del pa v obliki e-vaj (e-vaje se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).

Learning and teaching methods:

Lectures: students understand the theoretical frameworks of the course. Part of the lecture course is in a classroom while the rest is in the form of e-learning (e-lectures may be given via video-conferencing or with the help of specially designed e-material in a virtual electronic learning environment).

Tutorials: Students enhance their theoretical knowledge and are able to apply it. Part of the seminar is in a classroom while the rest is in the form of e-learning (e-tutorials may be given via video-conferencing or with the help of specially designed e-material in a virtual electronic learning environment).

Načini ocenjevanja:	Delež (v %) / Share (in %)	Assessment methods:
<ul style="list-style-type: none"> • Opravljene obveznosti e-predavanj in e-vaj so pogoj za pristop k izpitu. 		<ul style="list-style-type: none"> • Successful completion of e-lectures and e-tutorials is a prerequisite for entering the exam.
<ul style="list-style-type: none"> • Pisni izpit. 	50%	<ul style="list-style-type: none"> • Written exam.
<ul style="list-style-type: none"> • Seminaraska naloga. 	40%	<ul style="list-style-type: none"> • Seminar work.
<ul style="list-style-type: none"> • Predstavitev seminarске naloge. 	10%	<ul style="list-style-type: none"> • Oral presentation of seminar work.
