Cilji in kompetence:

- osvojijo znanja s področja tehnike in tehnologije embaliranja,
- spoznajo tehnološke procese embaliranja,
- se usposobijo uporabljati teoretična znanja v praksi.

Objectives and competences:

- gain the knowledge of techniques and technologies of packaging,
- are familiarized with technological packaging processes,
- learn to apply theoretical knowledge to practical situations.

Predvideni študijski rezultati:

Znanje in razumevanje:

Seznaniti študente s procesi logistike posebej nabave in skladiščenja s poudarkom na embaliraju in embalaži. Študenti obvladajo procese in principe embaliranja, metodami upravljanja v dejavnosti embaliranja in funkcijami ter veliko vlogo embalaže in embaliranja v procesih logistike. Usposobiti študente za izvajanje embaliranja v praksi.

Prenosljive/ključne spretnosti in drugi atributi:

Posredovati znanja študentom o uveljavljeni mednarodni teoriji embalaže in embaliranja ter jih usposobiti za samostojno delo. Spoznajo probleme embaliranja in embalaže ter veljavno zakonodajo. Spoznajo obveznost uporabe vseh varovalnih sredstev in spoznajo konstrukcijske in tehnične rešitve ter vodijo skrb o pripravah na specifične delovne razmere.

Intended learning outcomes:

Students will be familiarized with logistics processes from the field of purchase and warehousing, whereby emphasis is on packaging. Students will master technological processes of packaging, methods for managing packaging and other functions as well as the role packaging plays in logistics processes. Students are further trained to apply packaging theory to practical situations.

Transferable/Key skills and other attributes:

They learn about recognized international packaging theory and trained to work individually. They are familiarized with the problems of packaging wrapping and the valid legislation. The learn about the requirements for use of all safety means and learn about the construction and technical solution and manage preparations for specific working conditions.

Metode poučevanja in učenja:

Predavanja: pri predavanjih študent spozna teoretične vsebine predmeta. Del predavanj se izvaja na klasični način v predavalnici, del pa v obliki e-predavanj (e-predavanja se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta

Learning and teaching methods:

Lectures: students understand the theoretical frameworks of the course. Part of the lecture course is in a classroom while the rest is in the form of e-learning (e-lectures may be given via video-conferencing or with the help of specially designed e-

<p>namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).</p> <p>Vaje: pri vajah študent utrdi teoretično znanje in spozna aplikativne možnosti. Del vaj se izvaja na klasični način v predavalnici, del pa v obliki e-vaj (e-vaje se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).</p>	<p>material in a virtual electronic learning environment).</p> <p>Tutorials: Students enhance their theoretical knowledge and are able to apply it. Part of the seminar is in a classroom while the rest is in the form of e-learning (e-tutorials may be given via video-conferencing or with the help of specially designed e-material in a virtual electronic learning environment).</p>
