

UČNI NAČRT PREDMETA / COURSE SYLLABUS	
Ime predmeta:	INTELIGENTNI LOGISTIČNI SISTEMI
Course title:	INTELLIGENT LOGISTICS SYSTEMS

Študijski program in stopnja Study programme and cycle	Študijska smer Study option	Letnik Year of study	Semester Semester
LOGISTIKA SISTEMOV 3. stopnja		1.	1. in 2.
SYSTEM LOGISTICS 3 <sup>rd</sup> degree		1.	1. in 2.

Vrsta predmeta (obvezni ali izbirni) / Course type (compulsory or elective)	IZBIRNI ELECTIVE
--	---------------------

Univerzitetna koda predmeta / University course code:	DR
---	----

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS
20		AV LV RV			160	6

Nosilec predmeta / Course coordinator:	ROMAN GUMZEJ
---	--------------

Jeziki /Languages:	Predavanja / Lectures: SLOVENSKI/SLOVENE
	Vaje / Tutorial: SLOVENSKI/SLOVENE

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: Ni posebnih pogojev.	Prerequisites for enrolling in the course or for performing study obligations: None in particular.

Sustainable logistics and production in industry 4.0: new opportunities and challenges. [S. l.]: Springer Nature, 2020, pp. 145-160. Ecoproduction. ISBN 978-3-030-33369-0. ISSN 2193-4614. DOI: 10.1007/978-3-030-33369-0\_9.

#### Cilji in kompetence:

Cilji predmeta so:

- integracija obstoječih in novih znanj o informatiki v logistiki inovacijske družbe.

Kompetence, ki jih študenti osvojijo:

- analize kakovosti storitve logističnih sistemov in procesov,
- sinteze inteligentnih logističnih sistemov in rešitev.

#### Objectives and competences:

Course objectives are:

- integration of existing and new knowledge on Innovation society's logistics informatics.

Competences acquired by students:

- service quality analysis of logistics systems and processes,
- synthesis of intelligent logistics systems and solutions.

#### Predvideni študijski rezultati:

Študent bo po zaključku predmeta zmožen:

- izdelave znanstvenega ali strokovnega članka na osnovi individualnega raziskovalnega dela v okviru predmeta.

#### Intended learning outcomes:

Upon completion of the course a student will be capable of:

- creating a scientific or professional article based on individual research work in the framework of the subject.

#### Metode poučevanja in učenja:

Predavanja: v obliki konzultacij predstavljajo osnovo za individualno raziskovalno delo. Na konzultacijah študenti razširijo svoje znanje s teoretičnimi osnovami predmeta. Konzultacije potekajo v živo v manjših skupinah pa tudi v obliki e-predavanj na videokonferenčni način ter preko namenskih e-učilnic v e-učnem okolju.

#### Learning and teaching methods:

Lectures: in the form of consultations represent the foundation of individual research work. During consultations students extend their knowledge with the theoretical fundamentals of the course. Consultations take place live in smaller groups as well as in the form of e-lectures via videoconferencing and dedicated e-classrooms in the e-learning environment.

Delež (v %) /

Share (in %)

#### Assessment methods:

Načini ocenjevanja:		
Način (pisni izpit, ustno izpraševanje, naloge, projekt):	100%	Method (written or oral exam, coursework, project):

- znanstveni/strokovni članek

- scientific/professional article
