

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Ime predmeta:	MATEMATIČNE METODE 2
Course title:	MATHEMATICAL METHODS 2

Študijski program in stopnja Study programme and cycle	Študijska smer Study option	Letnik Year of study	Semester Semester
LOGISTIKA SISTEMOV 1. stopnja		1.	2.
SYSTEM LOGISTICS 1 st degree		1.	2.

Vrsta predmeta (obvezni ali izbirni) / Course type (compulsory or elective)	OBVEZNI
	COMPULSORY

Univerzitetna koda predmeta / University course code:	UN
--	----

Predavanja Lectures	Seminar Seminar	Vaje Tutorial	Klinične vaje Clinical training	Druge oblike študija Other forms of study	Samost. delo Individual work	ECTS
30 a-P 30 e-P		6 e-V 24 a-V			90	6

Nosilec predmeta / Course coordinator:	MAJA FOŠNER
---	-------------

Jeziki /Languages:	Predavanja / Lectures:	SLOVENSKI/SLOVENE
	Vaje / Tutorial:	SLOVENSKI/SLOVENE

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites for enrolling in the course or for performing study obligations:
Ni pogojev.	None.

Vsebina (kratek pregled učnega načrta):	Content (syllabus outline):
<ul style="list-style-type: none"> ▪ Diferencialni račun: odvod funkcije, geometrijski pomen odvoda, pravila za odvajanje, odvodi elementarnih funkcij, diferencial, višji odvodi, Taylorjeva formula, uporaba odvoda (ekstremi, prevoji, optimizacijske naloge). ▪ Nedoločeni integral: definicija, pravila za integriranje, vpeljava nove spremenljivke, delno integriranje, integriranje racionalnih funkcij, primeri. ▪ Določeni integral: definicija določenega integrala, geometrijski pomen in lastnosti, računanje, uporaba in primeri. ▪ Dvojni, trojni integral. ▪ Diferencialne enačbe: osnovni pojmi, diferencialne enačbe prvega reda, diferencialne enačbe drugega reda, primeri. 	<ul style="list-style-type: none"> ▪ Differential calculus: the derivative of a function, geometrical importance of a derivative, derivation rules, derivatives of elementary functions, a differential, higher order derivatives, Taylor's formula, application of a derivative (extremes, inflection points). ▪ Indefinite integral: definition, integration rules, introduction of a new variable, partial integration, integration of rational functions, application and examples. ▪ Double, triple integrals. ▪ Differential equations: basic terminology, first order differential equations, second order differential equations, examples. ▪ Functions of more variables: examples, partial derivatives, Taylor's formula ▪ Practical application in logistics: examples.

- Funkcije več spremenljivk: primeri, parcialni odvodi, Taylorjeva formula,
- Praktični primeri uporabe v logistiki.

Vidav, I.: *Višja matematika I*, Ljubljana: Društvo matematikov, fizikov in astronomov Slovenije, 1994 ISBN: 961-212-031-5 COBISS.SI-ID:40515072.

Vidav, I.: *Višja matematika II*, Ljubljana: Društvo matematikov, fizikov in astronomov Slovenije, 1994, COBISS.SI-ID: 146945.

Usenik, J.: *Matematične metode v prometu*, UL FPP, 1998, ISBN 961-6044-31-1 COBISS.SI-ID: 75814400.

Cilji in kompetence:

Študenti spoznajo in osvojijo pojme matematične analize, se naučijo natančnosti izražanja, pisanja in razmišljanja.

Cilj: kritično razmišljanje in uporaba teoretičnega znanja v konkretnih primerih in iskanju rešitev problemov ter njihove realizacije na področju logistike.

Objectives and competences:

Students are familiarised with and grasp the concepts of mathematical analysis and probability calculus, they learn to think, write and express themselves accurately and they gain the ability to apply their theoretical knowledge in practice in logistics.

Goal: critically thinking and use theoretical knowledge in concrete cases, and find solutions to problems and their realization in the field of logistics.

Predvideni študijski rezultati:

- Sposobnost obvladanja standardnih metod in postopkov matematične analize.
- Sposobnost uporabe pridobljenega teoretičnega znanja v praksi pri reševanju izzivov logistike.
- Avtonomnost v svojem strokovnem delu.

Pridobljeno teoretično in aplikativno znanje imajo študenti možnost uporabiti pri znanstveno raziskovalnem delu, pri nadgradnji naravoslovnih vsebin na 2. stopnji oziroma pri zaposlitvi.

Intended learning outcomes:

- The ability to master standard methods and procedures of mathematical analysis.
- The ability to use the acquired theoretical knowledge in practice in logistics.
- Independence in professional work.

Students acquire the theoretical and applicative knowledge in the field of scientific research, upgrading natural sciences at the second level, or employment.

Metode poučevanja in učenja:

Predavanja: pri predavanjih študent spozna teoretične vsebine predmeta. Del predavanj se izvaja na klasični način v predavalnici, del pa v obliki

Learning and teaching methods:

Lectures: students understand the theoretical frameworks of the course. Part of the lecture course is in a classroom while the rest is in the form of e-

e-predavanj (e-predavanja se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).	learning (e-lectures may be given via videoconferencing or with the help of specially designed e-material in a virtual electronic learning environment).
Vaje: pri vajah študent utrdi teoretično znanje in spozna aplikativne možnosti. Del vaj se izvaja na klasični način v predavalnici, del pa v obliki e-vaj (e-vaje se lahko izvajajo na videokonferenčni način ali s pomočjo posebej v ta namen didaktično pripravljenih e-gradiv v virtualnem elektronskem učnem okolju).	Tutorials: Students enhance their theoretical knowledge and are able to apply it. Part of the seminar is in a classroom while the rest is in the form of e-learning (e-tutorials may be given via videoconferencing or with the help of specially designed e-material in a virtual electronic learning environment).

Načini ocenjevanja:	Delež (v %) / Share (in %)	Assessment methods:
Opravljene obveznosti e-predavanj in e-vaj so pogoj za pristop k izpitu.		Successful completion of e-lectures and e-tutorials is a prerequisite for entering the exam.
Pisni izpit (računski del).	80%	Written examination (calculation part).
Pisni del (teorija).	20%	Oral examination (theory).
